CORE COMPETENCIES

- Full Stack Development
- RESTful API Integration
- CI/CD Pipeline Automation
- Blockchain & Web3 Integration
- Modular Domain-Driven Design
- UI/UX Component Development
- Database Design & Management
- Software Development Life Cycle
- Technical Specification Development
- Application Performance Tuning
- User Experience Design Principles
- System Integration Strategies
- Quality Assurance and Testing
- Continuous Integration and Deployment

EDUCATION

- **2018: B.E. in Computer Science and Engineering** from SB Jain Institute of Technology Management and Research Nagpur, India | CGPA: 7.88

HACKATHONS & ACHIEVEMENTS

- **Vani – AI Language Learning Platform:** Developed an AI-powered, conversation-based language learning platform and participated in the Google Gemini AI Competition. Leveraged modern web and AI technologies to create an engaging educational experience.
- **Arina – Decentralized Gaming Wager App:** Created for a hackathon and showcased on Devpost, this blockchain-based decentralized application enables friends to place wagers on casual games (e.g., FIFA, chess) using smart contracts, ensuring fair resolution and winnings distribution.
- **Hackathon Participation:** Actively participated in multiple hackathons, collaborating with cross-functional teams to develop innovative solutions addressing real-world problems through advanced technologies.

UTKARSH JUNGHARE

Full Stack Developer

PROFILE SUMMARY

- Highly focused **Full-Stack Developer** with **over 6 years** of experience in architecting and delivering robust, scalable, and high-performance **Web Applications** using modern technologies such as **TypeScript, React, Next.js, and Laravel**.
- Expert in designing and implementing **secure, efficient and well-documented RESTful APIs** that facilitate seamless integration across complex distributed systems and enhance interoperability.
- Proficient in **applying modular and domain-driven design principles** to develop maintainable, scalable codebases that align with evolving business needs and promote long-term product agility.
- Capabilities at leveraging **cloud platforms including Firebase and AWS** to build serverless and cost-effective solutions that optimize performance and scalability while minimizing infrastructure overhead.
- **Expertise in leading cross-functional teams, mentoring developers** and **driving adoption of best practices in code quality, testing, and deployment**, fostering a culture of continuous improvement and collaboration.
- **Skilled in integrating emerging blockchain technologies** and **Web3 protocols** to innovate and extend application capabilities, enabling next-generation decentralized solutions in real-world scenarios.

TECHNICAL SKILLS

- **Front-end Development**
- **Languages/Frameworks:** Typescript, JavaScript, React.js, Next.js, Bootstrap, TailwindCSS
- **Back-end Development**
 - Languages/Frameworks: Laravel, CodeIgniter
 - Databases: MySQL, Firebase Firestore
 - API Design: REST APIs, Firebase Functions, JWT Auth, Role-based Access Control
- **Blockchain & Web3 (Only Integration)**
 - Technologies: NEAR Protocol, EVM
 - Libraries & Tools : Wagmi, BOS Components, Thirdweb
- **DevOps & Cloud**
 - Platforms: Firebase (Auth, Hosting, Functions, Storage), AWS (EC2, S3), Vercel
 - Automation: GitHub Actions, GitLab CI/CD, Docker
- **Architecture & Infrastructure**
 - **Modular Domain-Driven Design (Clean Architecture):** Emphasizes separation of concerns by organising code into independent modules based on domain logic, promoting scalability, testability, and maintainability.
 - **MVC Architecture (Model-View-Controller):** A Structured application development pattern that separates business logic, user interface, and input control to streamline collaboration and improve code organization.

KEY HIGHLIGHTS

- Designed and implemented **CI/CD pipelines using GitHub Actions and GitLab CI/CD**, thus reducing **deployment time by 40%** and improved release frequency and reliability.
- Developed and maintained a reusable library of **50+ UI components**, accelerated development speed by **30% and ensured consistent** user interface design across projects.
- Mentored and guided **over 10 junior developers**, leading **5 internship programs** that provided practical training and skill development to **40+ students**, fostered a collaborative learning environment.

WORK EXPERIENCE

Sept'19 - Present: Kaliba Enterprises Private Limited, Nagpur, India

Growth Path:

Dec'21 – Present: Full Stack Developer

Highlights:

- Spearheaded **end-to-end product development** for multiple **0-to-1 projects** including an education platform, e-commerce store, and quiz application, thus delivered market-ready solutions with strong user adoption.

POSITIONS OF RESPONSIBILITIES

- **Head of Technical Committee, College Forum:** Led technical planning, setup, and coordination for **over 5** annual cultural and tech events with **500+ attendees**.
- Organized college-level coding competitions and workshops, engaging 200+ participants.
- **Member, Rotary Club, Nagpur:** Contributed to community service initiatives and local outreach programs.
- **Head Volunteer, Upay Foundation (NGO):** Managed a team of **10+ volunteers** to execute educational programs for **100+ underprivileged children** and coordinate donation drives.

SOFT SKILLS

- Analytical Thinking
- Problem-Solving
- Effective Communication
- Initiative & Ownership
- Adaptability
- Attention to Detail

PERSONAL DETAILS

- **Date of Birth:** 3rd January 1996
- **Languages Known:** English, Hindi, Marathi
- **Address:** Nagpur, Maharashtra, India

- Engineered and deployed **15+ scalable web and mobile applications** leveraging React, Next.js, Firebase, Expo, Laravel, and CodeIgniter, thus ensuring responsiveness and high performance across devices.
- **Delivered 5+ blockchain-enabled solutions** integrating NEAR BOS, Thirdweb, and EVM-compatible wallets, supporting seamless high-volume user transactions and decentralized application functionality.
- Integrated diverse RESTful APIs and third-party services, thus enhancing application functionality and user experience while maintaining security and scalability.

Sept'19 – Dec'21: Web Developer

Highlights:

- Developed and optimized **10+** responsive, mobile-friendly websites using HTML, CSS, JavaScript, and Bootstrap, thus improving accessibility and user engagement metrics.
- Built secure, scalable back-end services & APIs with PHP frameworks Laravel and CodeIgniter, including database schema design and optimization for MySQL & Firebase Firestore.
- Integrated third-party APIs to enhance functionality, streamlined workflow, and improved overall application performance and user satisfaction.
- Managed full project lifecycles, including deployment and hosting environment setup, thus ensuring reliable and scalable infrastructure for client applications.
- Applied advanced UI/UX design principles to create visually appealing and user-centric interfaces, enhancing usability and customer retention.

PROJECTS

Education Platform:

- Developed a multi-platform learning system featuring course management, quizzes, and AWS cloud integration.
- **Technologies Used:** Laravel, AWS (EC2, S3), Bootstrap.

E-commerce Platform:

- Built a scalable web and mobile store with comprehensive order management, payment integration, and an administrative dashboard.
- **Technologies Used:** Laravel, MySQL, Bootstrap.

Quiz Application:

- Created an interactive quiz application supporting dynamic categories, real-time scoring, and cross-platform functionality.
- **Technologies Used:** React.js, Firebase, CodeIgniter.

Event Management System:

- Designed a vendor-client platform for event bookings, scheduling, and secure payments.
- **Technologies Used:** Laravel, MySQL, Bootstrap.

Car Marketplace:

- Developed a used car buying and bidding platform with inspection workflows and real-time auction capabilities.
- **Technologies Used:** CodeIgniter, AWS (EC2, S3).

Blockchain Solutions:

- Delivered decentralized applications with BOS components, wallet integrations, and EVM smart contracts.
- **Technologies Used:** NEAR BOS, Next.js, Thirdweb, TypeScript, Tailwind CSS.
